PROFILE

Senior Software Engineer specializing in Java backend development, with experience since 2020 across transport, geospatial and security platforms. Combines technical leadership with hands-on delivery: modernizing legacy systems, optimizing performance and improving automated testing. Also builds complete web products, from frontend and backend to payments and deployment.

PROFESSIONAL EXPERIENCE

Securitas Direct Mar 2023 - Present
Backend Lead

- Led the modernization of a legacy platform, migrating from a Java wrapper to Java 17 microservices with a decoupled, multi-module hexagonal architecture.
- Reduced critical query times from **3 minutes to 12 seconds** through Redis caching and query optimization.
- Increased automated test coverage from **0% to 80%**, measured in SonarQube, by establishing an automated testing strategy.
- Reduced boilerplate and technical debt through SOLID principles and clean code practices; passed Fortify security validations.

Geoportail Oct 2021 - Mar 2023
Full Stack Developer

- Developed features for the French geospatial platform using Java 17, Spring Boot, JPA, MongoDB and Angular.
- Implemented aerial image uploads to Amazon S3 and integrated geospatial data processed in Python into MongoDB.
- Configured and maintained GitLab CI/CD pipelines, supported deployments with Rancher and centralized logs and dashboards with Elasticsearch and Kibana.
- Onboarded and mentored junior developers, sharing engineering practices and supporting their integration into the team.

Renfe Sep 2020 - Oct 2021
Junior Java Developer

- Maintained and evolved a service used by **over 500,000 daily passengers**, supporting hundreds of thousands of daily web and app accesses.
- Built an API-first ticketing and claims microservice, replacing paper-based forms with a digital workflow.
- Handled production incidents and collaborated on design, testing and integration of new features across the microservices ecosystem.

VLAD DUMITRU DINCA

EDUCATION

Bachelor's Degree in Computer Science

UNED - Universidad Nacional de Educación a Distancia · **2022 - 2026**

Official Spanish qualification: Grado en Ingeniería Informática.

Higher Vocational Diploma in Multiplatform Application Development

CPIF Los Enlaces · Zaragoza, Spain · **2019 - 2021**

SELECTED PROJECTS

Experience-Now · MotoGP & Estrella Galicia

Backend Developer

- Developed backend services for a MotoGP mobile application focused on VIP user management, using AWS Lambda and API Gateway.
- Designed and managed Amazon Aurora database schemas and tables to support VIP user operations.

Cierzo Sports

End-to-End Developer · cierzolgtb.org

- Independently built and deployed the platform: frontend, backend, authentication, payment integration, architecture and hosting.
- Enabled hundreds of participants to register for an international volleyball tournament in Zaragoza and built an organizer intranet for registrations, resources and event logistics.

Elisa Designer

End-to-End Developer · elisandesign.com

- Built and deployed a designer portfolio with animations and interactive interfaces to showcase creative work.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, JPA, WebFlux, MapStruct, Liquibase.

Architecture: Microservices, hexagonal architecture, API-first, event-driven systems, SOLID.

Data & messaging: SQL, PostgreSQL, Oracle, MongoDB, Redis, Kafka, RabbitMQ.

Cloud & delivery: AWS (Lambda, S3, API Gateway, Aurora), Docker, Kubernetes, GitLab CI/CD, Jenkins, Maven.

Quality & observability: JUnit, Mockito, Selenium, SonarQube, Fortify, Elasticsearch, Kibana, Grafana.

Frontend & scripting: Angular, React, TypeScript, JavaScript, HTML, CSS, Python.

LANGUAGES

Spanish: native · **English:** professional proficiency · **French:** basic
